MANPOWER AND EQUIPMENT CONTROL

STAFFING GUIDE FOR ARMY NATIONAL GUARD MILITARY PERSONNEL MANAGEMENT OFFICES

Summary. This pamphlet outlines the organization, mission and functions of Army National Guard Military Personnel Management Offices. Staffing tables in this pamphlet reflect the results of manpower staffing standards studies (MS-3) conducted by the Army National Guard Manpower Division (NGB-ARM).

Applicability. This pamphlet applies only to Army National Guard Military Personnel Management Offices.

Interim Changes. Interim changes are not official unless authenticated by the Executive, National Guard Bureau. Interim changes will be destroyed on their expiration dates unless sooner superceded or rescinded.

Chapter 1

Introduction

Section I

Nature and Purpose of Staffing Guide

1-1. Purpose.

a. This staffing guide provides guidance for determining the number and types of personnel required to operate National Guard Military Personnel Management Offices.

b. The workload factors contained in this guide are designed to be applicable to all ARNG activities with the exception of Guam. These workload factors will assist managers in the field in determining manpower requirements.

1-2. General Applicability of the Staffing Guide.

a. Manpower. Staffing tables indicate all required manpower regardless of source. Staffing tables provide for a 40 hour a week operation unless otherwise noted and include allowances for non-available time such as annual and sick leave, training and orientation and military duties.

b. Operating Situations.

(1) Manpower requirements shown in this guide are those required to perform recognized federal functions under optimum operating situations.

(2) The staffing guide does not constitute an authorization for positions or personnel. The Support Personnel Manning Document (SPMD) issued by the Manpower Division. is the authorization for hiring authority to the states.

1-3. Use of the Staffing Guide in Manpower Surveys.

a. This guide will be used as a base document for identification of functions associated with each major work center.

b. This staffing guide will be revised periodically to reflect changes in manpower requirements based on current activities, organization and mission. The basic sources of information for revision of this guide are manpower survey reports, TDAs, organization and function manuals, directives issued by the Chief, National Guard Bureau and Department of the Army. Survey reports will be prepared in sufficient detail to provide sufficient information regarding workload, identification and definition of work units, number of personnel used and manhours expended.

c. New or revised functions, when appropriately validated, will be used. Workload data must be expressed in terms of the identified workload factor annotated on each staffing table.

d. Development of New Staffing Tables. When sufficient information is available, new staffing tables will be developed and incorporated into future changes or revisions of this guide.

e. Refinement of Existing Guide. For some functional areas, a staffing table has been provided, but no standards developed because of insufficient workload and manhour data. Validated manpower requirements for these areas will be determined following development of sufficient historical workload data.

1-4. Manpower Utilization.

a. While intended chiefly as a guide for determining proper manpower requirements for the performance of ARNG Military Personnel Management functions, this guide also has an important related objective, the conservation of manpower resources. In accordance with the Department of the Army (DA) policy of exercising utmost economy in use of manpower, every effort should be made to operate within recognized requirements or to operate with less manpower than indicated.

b. Staffing requirements based on guidelines established in this publication should be reduced when automatic data processing is used to accomplish the function or tasks; e.g., maintenance of records and preparation of reports.

1-5. Manpower Management.

a. A primary goal of the ARNG Directorate is to provide favorable and expeditious response to full time support manpower requests. To achieve desired manpower management objectives and conform to DA policy, the following procedures are followed by NGB-ARM prior to validating manpower requests.

(1) Analysis of mission and workload.

(2) Analysis of operating procedures.

(3) Review of all existing and proposed position descriptions to assist in determination of functional responsibilities.

(4) Analysis of current position utilization.

(5) Resolution of all personnel/management problems (to include training/organization structure).

b. In order to effectively determine manpower requirements, requests for additional manpower must include:

(1) Statement certifying all functions have been reviewed and prioritized, unnecessary functions have been eliminated and personnel working in areas of decreased workload have been realigned to areas with increased workload.

(2) Evidence of new missions assigned by NGB.

(3) Existing and proposed position descriptions.

(4) Estimated workload.

(5) Program contents, including functions to be performed.

(6) Documentation of existing backlog for individual work centers.

(7) Copies of Standing Operating Procedures (SOPs).

(8) Proposed organization structure.

c. All manpower requests will be submitted to NGB-ARM for consideration and action. Coordination of study plans will be made with the appropriate Office of Primary Responsibility (OPR) on the NGB staff. OPRs will provide technical expertise/ liaison on responsibility of functional areas, organizational structure, current management information systems and reports, and technical guidance to facilitate comprehensive study planning.

Section II

Using the Staffing Guide

1-6. Staffing Table Code Structure. Chapter 2 contains a series of staffing sections, each representing a branch or component of the Military Personnel Management Office (MPMO).

    a. **Army Functional Dictionary Coding.** Each staffing table indicates an Army Functional Dictionary (AFD) Code for the work center. This code has been selected ensuring consistency with the overall mission and specific responsibilities of the work center or function. Use of this code is in accordance with Army guidance to develop a data base for effective control of functional information. A list of the codes used in this guide are located in Appendix A.

    b. **Manning Document Numbers.** Staffing tables include the Manning Document Number (MD No.) assigned to the Support Personnel Manning Document by the Manpower Division. This will assist manages in cross referencing the table with the appropriate SPMD. If a disparity exists between the SPMD and this document, the number on the SPMD will prevail.

1-7. Work Center Descriptions (WCD). Each work center is prefaced by a summary of work performed. The WCD encompasses all federally recognized functions that should be performed by the organization. A detailed functional breakout is available upon request from the Manpower Division, Validation, Methods and Standards Branch (NGB-ARM-V).

1-8. Organization Charts. The structure depicted by the organization charts were developed with consideration for future needs of the Army National Guard. The organizational structure is employed to facilitate presentation and application of staffing information contained in this guide. Within each staffing section, an organizational block is depicted. Directly below this block are the broad general functional areas for which the branch is responsible. This may assist managers in developing the internal organization within the respective branch.

1-9. Staffing Tables. Staffing tables provide specific guidance for determining the appropriate number and kinds of personnel to staff each organizational element. The contents of the staffing table are further explained below.

    a. Quantitative Guidance.

        (1) Workloads are expressed in terms of significant workload factors as annotated on the table, unless otherwise specified.

        (2) Minimum manning computations are used in situations where work measurement is not of any benefit. Such computations are so noted within the staffing table.

        (3) Whole man position requirements are used when a staffing pattern technique is used for documentation, such as a directed requirement.

(4) Where no staffing requirement could be developed because of lack of experience data, unmeasurable nature of work, or other reasons, minimum manning has been provided and annotated as a footnote to the table.

(5) All staffing standards, regardless of how they may be expressed in a staffing table, must be regarded as points of departure and should not be applied rigidly.

(6) Worksheets are provided, where appropriate, to assist the user in properly determining requirements.

(7) Standards developed for each work center are classified into one of five types. A detailed explanation of the statistical parameters for each type standard is contained in Appendix B. Each table is prefaced by the standard type. If an individual position deviated from the overall work center type, it is annotated separately as a footnote to the table.

b. Qualitative Guidance.

(1) Military Position Titles. Titles given to military positions (both Active Guard Reserve (AGR) and technician) are descriptive to to the duites performed, and where applicable, conform to the speciality titles under military personnel management systems. Official titles for technician positions are determined by NGB-TN.

(2) Footnotes. Explanatory or qualifying footnotes or remarks intended to supplement information given in the staffing tables are provided immediately below the table in the appropriate "Remarks" section.

Staffing Sections

Section I

Organization of the Military Personnel Management Office

2-1. **General Organization.** The general organization of the Military Personnel Management office is depicted in Figure 2-1. Staffing tables have been developed reflecting this structure. Work Center Descriptions for each branch are outlined in subsequent sections of this pamphlet. These descriptions are intended to present the major functional requirements for each branch. Primary elements of the MPMO are:

    a. Office of the Military Personnel Officer (MPO).

    b. Military Personnel Plans and Actions Branch.

    c. Administrative Services Branch.

    d. SIDPERS Interface Branch.

    e. Recruiting and Retention Branch.

    f. Personnel Service Center (PSC). No work center descriptions or tables are presented for the PSC. Validation of the functions and requirements of the PSC will be determined at a later date and published as a change to this pamphlet.
